

SHEILA ALEMANY BLANCO

Fast-learner passionate about pursuing higher education that will allow me to contribute and develop ideas using artificial intelligence that will be globally impactful.

EDUCATION	B.S. in Computer Science and B.S. in Mathematics (Dual-degree) <i>Fall 2014 - Spring 2019 (Expected)</i> <i>Florida International University (FIU), Miami, FL - CGPA: 3.74/4.00</i>
	Deep Learning Nanodegree Foundations, Udacity <i>Fall 2017</i> Learned the foundations of deep learning using neural networks to complete tasks such as image classification with convolutional neural networks, speech/text translation with recurrent neural networks, and image generation using generative adversarial networks.
RESEARCH EXPERIENCE	Research Assistant, Research Experience for Undergraduates at FIU <i>Fall 2018 - Present</i> Building a lightweight, scalable blockchain open-source framework on the Hyperledger Sawtooth platform suitable for resource-constrained devices in the Internet of Things. Sponsored by the National Science Foundation and Department of Defense. (Advisor: Dr. Niki Pissinou)
	Volunteer Research Assistant, School of Computing and Information Sciences at FIU <i>Spring 2018 - Present</i> Assisted in the development and implemented the simulation of a prediction technique for mobile wireless sensor networks whose main focus was to improve space complexity while maintaining the behavioral information of sensor data. Direct contribution was the use of dynamic time warping as the similarity metric between abstracted data, and a support vector machine for trend prediction. (Advisor: Dr. Niki Pissinou)
	Cyber Analytics & Decision Systems Research Intern, MIT Lincoln Laboratory <i>Summer 2018</i> Conducted exploratory data analysis to assist in the process of improving machine learning approaches that predict cyber-attacks. Contributed to the existing set of metrics by proposing new evaluation techniques that use statistical methods, natural language processing, and clustering techniques. (Advisors: Dr. Joseph Zipkin and Dr. Amy Hughes)
	Research Intern, Research Experience for Undergraduates at FIU <i>Summer 2017 - Spring 2018</i> Collaborated on two projects. One consisted of improving upon the work done as a Research Assistant for the Army Educational Outreach Program, including making the method more robust with less user-defined parameters. The second project formally applying category theory to data cleaning for mobile wireless sensor networks by finding ways the decision-making method would benefit from categorically organizing the data each sensor receives. (Advisor: Dr. Niki Pissinou)
	Research Assistant, Army Educational Outreach Program at FIU <i>Fall 2016 - Spring 2017</i> Implemented and simulated a technique for data cleaning in mobile wireless sensor networks that used an economic model for determining the trustworthiness of candidate sensors to improve data accuracy. Simulated using MATLAB and the BonnMotion Mobility Generation and Analysis Tool. (Advisor: Dr. Niki Pissinou)
TEACHING & MENTORSHIP	Learning Assistant, School of Computing and Information Sciences (SCIS) at FIU <i>Fall 2017 - Present</i> Assisted during hands-on projects in class and held office hours for a Computer Organization course in order to promote and expedite student learning throughout the semester. Main course topics are caching, design of memory and microprograms using MIPS, and parallelism using CUDA.
	Mentor, Big Sisters Mentorship Program at FIU <i>Fall 2017</i> Guided a 10th grade student through the basics of JavaScript using Code.org's App Lab in a two hour sitting then connected with her weekly for the next three weeks to supervise her progress on completion of the app and address any possible questions while motivating her to pursue higher education in STEM.
	Tutor, Academic Success Initiative at FIU <i>Fall 2015 - Summer 2016</i> Facilitated subject understanding for students in group sessions or scheduled one-on-one meetings outside of class for Fundamentals of Computer Systems and Discrete Mathematics courses.

SELF-DRIVEN PROJECTS	<p>Artificial Intelligence Project Lead, <i>Upsilon Pi Epsilon SparkDev at FIU</i> <i>Fall 2017</i></p> <p>Predicted the trajectory path of hurricanes using a recurrent neural network (RNN). Lead a group of six students to complete this project in nine weeks using Python and Keras API. This project led to an independent research project where I employed a novel method that utilized an RNN and fine grid to learn the nonlinear behavior of hurricanes and more accurately predict hurricane trajectories.</p> <p>Neural Gonna Give You Up Team, <i>UHack 2017</i> <i>Fall 2017</i></p> <p>Applied a recurrent neural network using Python and Keras to manipulate any musical beat into Rick Astley's <i>Never Gonna Give You Up</i>. Won Best Artificial Intelligence and Machine Learning Hack.</p>								
TECHNICAL STRENGTHS	<table border="0"> <tr> <td>Computer Languages</td><td>Python, C, CUDA, Java, Assembly (LC3 and MIPS), F#, Prolog, SQL, HTML, CSS, JavaScript, PHP</td></tr> <tr> <td>Python Libraries</td><td>NumPy, Pandas, Keras, TensorFlow, Scikit-learn, NLTK, Jupyter Notebook</td></tr> <tr> <td>Software/Version Control</td><td>MATLAB, Virtual Box, AutoCAD, Git, \LaTeX</td></tr> <tr> <td>Spoken & Written</td><td>Fluent in English and Spanish</td></tr> </table>	Computer Languages	Python, C, CUDA, Java, Assembly (LC3 and MIPS), F#, Prolog, SQL, HTML, CSS, JavaScript, PHP	Python Libraries	NumPy, Pandas, Keras, TensorFlow, Scikit-learn, NLTK, Jupyter Notebook	Software/Version Control	MATLAB, Virtual Box, AutoCAD, Git, \LaTeX	Spoken & Written	Fluent in English and Spanish
Computer Languages	Python, C, CUDA, Java, Assembly (LC3 and MIPS), F#, Prolog, SQL, HTML, CSS, JavaScript, PHP								
Python Libraries	NumPy, Pandas, Keras, TensorFlow, Scikit-learn, NLTK, Jupyter Notebook								
Software/Version Control	MATLAB, Virtual Box, AutoCAD, Git, \LaTeX								
Spoken & Written	Fluent in English and Spanish								
AWARDS & HONORS	<ul style="list-style-type: none"> • 2018 Computing Research Association (CRA) Outstanding Undergraduate Researcher Finalist • 2017 FIU SCIS Outstanding Undergraduate Student Research Award • 2017 FIU SCIS Scholarship to attend the Grace Hopper Conference • 2016 Great Minds in STEM (GMiS) Scholar: Sponsored by Dell to attend the 2016 GMiS Conference in Anaheim, CA and to receive a \$2,500 academic merit-based scholarship • Member of Upsilon Pi Epsilon honor society for the computing and information technology disciplines (Inducted Fall 2016)
